

CONTRACT VAULT – READY FOR A NEW WORLD

Contract Vault

Smart contracts and blockchain are taking the world by storm – but not everyone can take advantage. Lawyers, consumers and corporations find it hard to reap the benefits of this new technology. Not to mention access to audited high-quality “conventional” legal contracts.

Contract Vault is an advanced platform built with blockchain technology that allows users with little or no legal or technical knowledge to create, customize, manage and deploy legal contracts and legally-enforceable smart contracts and makes the trade of physical property and rights on the blockchain possible.

THE FUNDAMENTALS

WHITE-LABEL SOLUTION

We are crafting partnerships with law firms, banks, insurances and other corporations to speed up the adoption of smart contracts. These businesses can offer their own Contract Vault to their customers.

CONTRACT BUILDER

Create your own contracts or modify existing contracts to suit your needs using our visual tools and natural language processing. Use Ricardian Contracts to ensure the legal enforceability of your smart contracts.

MARKETPLACE

Access, customize and deploy a wide variety of secure, legally-reviewed and legally-binding contracts created by experts. Rate and discuss contracts or access legal and technical advice directly.

ENTERPRISE-READY

Our API enables enterprises to create or enhance applications by integrating their existing processes with smart contracts without spending months developing them.

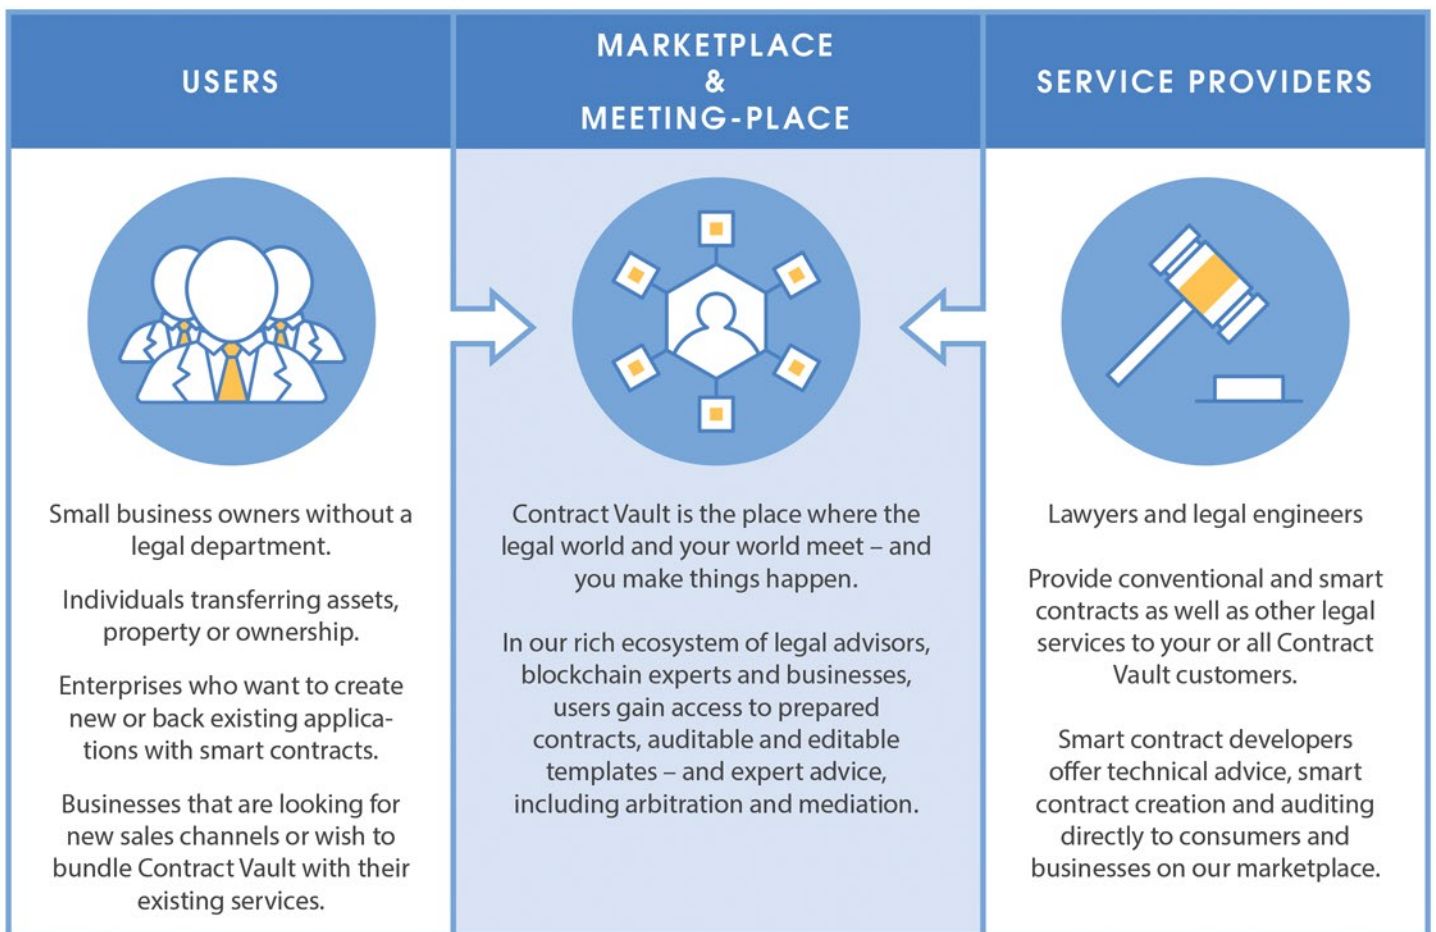

POWERFUL

Bridge the gulf between legal contracts and smart contracts. Create any contract, from simple agreements to entire Legal-, Insure- or Fintech applications leveraging on-chain and off-chain events and enable the transfer of new types of assets.

ACCESSIBLE

Use our intuitive interface for creating, testing and managing conventional and smart contracts using only a browser or mobile device. Service providers gain access to new customers through an opt-in advertising platform.

WHO BENEFITS?

YOU
(...NEED A CONTRACT)

No need to wait or worry – verified, legally-binding contracts are available whenever you need them. Also, no need to be a technical genius – you can deploy a smart contract customized to your needs, without investing time, money and effort in creating one from scratch.

If your situation requires special attention – legal experts and technical advice are just a few clicks away.

YOU
(...ARE A LAWYER)

Bring your services and expertise closer to potential customers by empowering them with easily-accessible content and on-demand advice.

Expand your reach and range of services in the world of legally-enforceable smart contracts without having to become a programmer.

Meet the future – head on.

YOU
(...ARE A SMART CONTRACT DEVELOPER)

Meet exactly the people who need your technical knowledge – when they need it.

Provide templates for smart contracts and technical audits and gain access to legal opinions when you build smart contracts for your clients.
